

5th User Council Meeting

Summary of proceedings

Date: 21st November 2023

Agenda of the meeting

- i. Presented key updates of the ONDC Network and scale-up support activities
- ii. Introduction to self-service portal
- iii. Introduction to Open Data Framework and its implementation roadmap
- iv. Orientation on the revised and simplified network policies
- v. Approach on adoption on static terms
- vi. Approach on adoption of IGM & RSF

Key Decisions taken:

- i. ONDC will implement the Open Data Framework to create publicly available Network-level insights based on data shared by the Network Participants as part of Network Observability
- ii. ONDC will release the simplified version of the Network Policies, after incorporating the feedback from the Members.
- iii. An approach on the implementation of static terms was finalised. ONDC will develop standardised model templates in consultation with Network Participants, and NPs will set the values against the parameters in the template. The template itself can be modified in the future using a consensus-driven change management process with all the Network Participants.
